

DS-K6B411TMX Value Smart Swing Barriers

- Supports AP mode for mobile Web, for Android phones to access more easily by a simple touch via NFC function.
- Supports built-in face recognition camera module on the top of cover, easy and convenient.
- Anti-passback: Supports cross-device anti-passback function, effectively preventing unauthorized personnel from following in.
- WEB management: Supports mobile Web and PC Web management, and can perform operations such as personnel management, parameter configuration, event query, and system maintenance.
- Fire linkage: The equipment has a fire linkage interface. When the fire signal is triggered, the barrier will be open automatically for emergency evacuation.
- Barrier is in free status when powering down, allowing people to pass freely. Super capacitor (optional) can realize automatic door opening in case of power failure.
