

Color: White

Sizes: 35-46

Validity: 36 months

Internal shoe length:

270 mm

Heel counter height:

260 mm

Weight per shoe:

0.782 kg

ACQUA LEV 85BPC600

REDUCED: 81000038

CA: 43935 LINE: ACQUA LEV

Protective waterproof boot, with 260mm short-shaft, Acqua Lev series, made of white polyvinyl chloride (PVC) and nitrile, providing better resistance to abrasion, drying and cracking. Polyester lining, no toecap. Sole made of PVC plastic polymer reinforced with nitrile, injected in a single piece, 2mm shaft thickness and side grooves for easy donning. Rubberized non-slip touch.

UPPER:

Made of polyvinyl chloride and nitrile (improves abrasion resistance). Injected in one piece, thickness of 2.0 mm on the shaft (size 40), with side grooves for easy donning.

TOE CAP:

None.

SOLE:

Sole made of PVC plastic polymer and nitrile (non-slip rubbery touch), with 10.1 mm groove in the heel. The front area of the sole is open to provide a perfect flow of liquids.

INSOLE:

None.

APPLICATIONS:

Agrícola

Doméstico

Servicios

PACKAGING:

BULK BOX SIZE

590 X 310 X 330 MM

PLASTIC BAG L:

W 400mm x H 460mm

TECHNICAL REPORT:

OB - Occupational footwear, basic requirements met.

E - Energy absorption in the heel region

FO - Fuel/Oil resistant sole

SRA - With slip resistance on ceramic flooring

Note: All measurements are based on 40-size shoes, which may vary from other sizes.
